

PETER TOSS

Full-Stack Developer

SUMMARY

Passionate and detail-oriented Software Engineering student & Full-Stack Developer with a strong foundation in Next.js and over a year of hands-on experience in Laravel backend development. I combine my technical expertise with a background in digital marketing to build user-focused, high-performing web experiences that balance functionality and visual appeal. Skilled at understanding both the technical and business sides of a product, I aim to create solutions that drive engagement, performance, and growth. Motivated, creative, and eager to contribute to a dynamic team where innovation and user experience come first.

EDUCATION

Damascus University

2022 - 2027

- Bachelor of Engineering, Information Technology

WORK EXPERIENCE

- **Full Stack Developer Internship**

Oct 2025 - Nov 2025

Codveda Technologies

- **Digital Marketing Manager**

Sep 2024 - Jan 2025

Kirby Company

- As a Digital Marketing Manager at Kirby Company, I led a dynamic and results-driven team, overseeing the development and execution of innovative marketing strategies across multiple digital platforms. I played a pivotal role in driving brand awareness, customer engagement, and revenue growth by utilizing data-driven insights and implementing tailored campaigns. My leadership ensured efficient collaboration within the team, fostering a culture of professionalism, creativity, and accountability.

- **Sales And Marketing Specialist Internship**

Oct 2024 - Oct 2024

Kirby company

- During my internship at Kirby Company, I gained hands-on experience in marketing and sales strategies. I learned how to effectively market products, negotiate with clients, and attract customer attention. Additionally, I developed key skills in sales techniques, communication, and building strong client relationships to drive business success.

PROJECTS

- **Fatleh – Smart Tourism Platform:**

A comprehensive tourism application designed to deliver a seamless travel experience across Syria. Users can explore destinations, hotels, restaurants, and activities; book ready-made or custom trips; and reserve flight tickets through integration with Amadeus API. The system also supports secure online payments via Stripe and real-time notifications for bookings.

My Role:

Developed and implemented the entire backend using Laravel 11, including RESTful APIs for Flutter integration, authentication and security layers, Amadeus flight search / booking integration, Stripe payment gateway, and a notification system using Laravel Events + Firebase. Designed the database architecture, built the admin dashboards, applied advanced validation and error handling, and optimized performance through caching and eager loading.

- **Syria Explorer – Digital Tourism Platform (Prototype & Live: syriaexplorer.com)**

A startup-stage digital platform built with Next.js, dedicated to showcasing Syria's rich cultural heritage, historic sites, and traditions. Users can explore tourist destinations and ancient sites, and access articles, news and travel-recommendations — all aimed at giving the world a fresh and authentic view of Syrian culture.

Key Responsibilities & Technologies:

- Founded the project and spearheaded the front-end architecture, ensuring a responsive and engaging UI with Next.js.
- Structured content for multiple sections: Places, Articles, News — designing a scalable information-architecture.
- Implemented SEO best-practices and performance optimization (code-splitting, fast-loading pages) to enhance discoverability.
- Integrated a lightweight headless CMS (or structured content store) for efficient editorial workflows.
- Deployed the live prototype and continue to iterate on features, acknowledging the project is in startup mode and further development is ongoing.

SKILLS

Technical Skills:

- JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive Web Design, Cross-browser Compatibility, React.js (Functional Components, Context API), Next.js (SSR, SSG, API Routes, Dynamic Routing), Nest.js (Backend Development), Laravel (Backend Development), RESTful & MySQL API Integration, Git / Version Control, UI/Styling Frameworks (Tailwind CSS, Material-UI, Styled-Components), Performance Optimization (Lazy Loading, Code Splitting, Image Optimization).

Soft Skills:

- Understanding of Digital Marketing & User-Centric Design, Team Collaboration, Problem-Solving, Adaptability, Continuous Learning of New Web Technologies.

LANGUAGES

- **Arabic** : Native
- **English** : Fluent
- **French** : Intermediate
